

Namaste,

My name is Manju and I am currently studying in BALLA second year at Kathmandu School of Law. I am really happy for what I am having course because I am enjoying it a lot though this is much more difficult. I have to deal with 9 subjects and they are as follows:

1. International organization
2. International relation
3. Criminal law
4. Clinical legal course
5. Law making process and legislative principle
6. Legal Nepali
7. Legal English
8. Sociology of law
9. Principle of rule of procedural law

In previous year I was just studying the basic concept and principles of law but now a days I have been dealing with national to international law, law making process, law related to criminal and so on. Though they are so vague and hard I am trying my best and doing hard labour as much as I can.

Recently we are having debate competition in college and had three rounds. I went to second round (semi final.) Despite doing my best I could not reach to final which made me feel so much bad but I had gathered lots of knowledge

during my debate competition and through my research. OBOR is very hot and debatable issues between China and Nepal so on that issues our college is also going to have negotiation and our classes have been further classified into 2 zones and we are being selected for negotiation between China and Nepal (we will be playing role of diplomats both countries)

Among all students 10 are selected for that negotiation out of 120. 5 students from one zone and 5 students from next zone and I am also selected for that negotiation and I will be representing Nepal.

I am also working in Amnesty international organization 3,4 weeks ago I had went to right to write campaign for the victims of China , Rohinga, and many other more issues and we were able to collect 4995 signature for the rights of other people who were innocent and about to have punishment, who are not protected by their states and we were much success in this program and we had sent that signature and latter to concern states for their right.

Hopefully they will provided their rights. After 10 days we will have winter vacation for one week and our college along with Nelsa(Nepalese law student association) is going to organize the civic awareness program in different district specially in remote area and also non aware place because our country had put steps on the path of federalism and many of villagers are unknown about this and benefits of this.

So as being a law student and responsible person I am also going to join in this program. Which made so much happy and proud of studying law where I am going to do social engineering and it has really made me some sense that I have to do a lot for others ,help them for their right as much as my ability can.

As we all are aware that in our country there still exists a caste system and untouchability though there are lots of law regarding untouchability . High caste people still treat low caste people like animal , they misbehave with these people in most of the place of Nepal. I am also one who belongs to low caste. This is the things which I hate most what I believe is all human being are equal and no one is superior to each other and I really want to eliminate this things from my community, society, nation and even from whole world as like Martin Luther King Jr., Nelson Mandela, Abraham Lincoln had abolished the racism discrimination between black people and white people and had maintain equality and maintaining harmony. I have been thinking of this and I have talk with some of the friends, and I had concern with few of the student from other college who belong to these caste system and want to abolish this

system I have been reading lots of article regarding this practice and system . I really don't know whether I will be able to do this or not but I am doing as per my capacity . I am consulting with my teacher for materials which help for me .

Finally I had move to my college hostel which is really nice and I am really enjoying it we have lots of junior in hostel so I also have the responsibility to help them in their studies which I am doing too. Now days I am spending my time in library and with international political news and event too.

At last but not the least I would like to thank you for all (FONAI,CFF AND OTHER who are helping me individually) I would not be in this stage who am I is ? where am I is? And what am I is? All because of your love, care, support and trust towards me and once again I am so much honor and thankful for providing me such an amazing platform .

Yours sincerely, Manju
